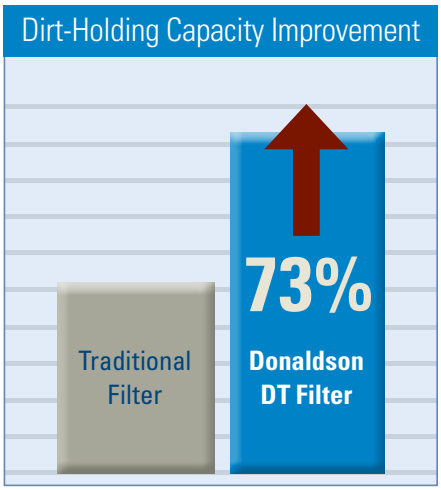
Donaldson FILTRATION SOLUTIONS

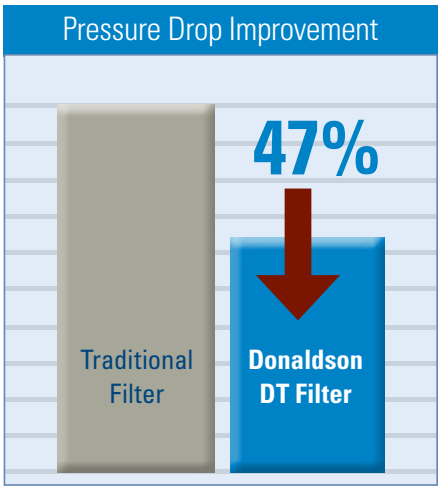
High-performance DT filters provide superior hydraulic system protection.

Premium Uptime Protection

Every hydraulic system has suspended particles in its fluid. Contaminants grind and wear at the surface of moving parts, introducing even more particles into the system. These contaminants cause more than 70% of all hydraulic system downtime.

Donaldson high-performance DT cartridge filters provide better protection from the particles and contaminants that reduce the effectiveness of lubricant and hydraulic fluid. Using Donaldson Synteq™ media technology, these filters extend filter life, allow higher initial cleanliness and provide superior system protection.





Donaldson DT filters are ideally suited for a variety of demanding applications, including:

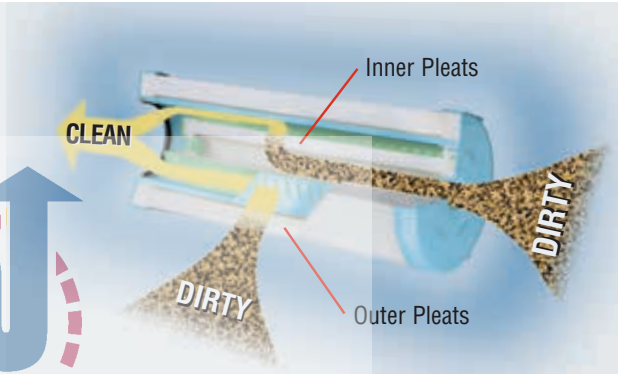
- heavy-duty mobile equipment
- in-plant hydraulics
- transmissions
- bearing lube oil systems

Donaldson DT filters are stocked and ready to ship!

DT DX2 Coreless Filters

Unlike traditional filters, this high-performance filtration solution features an innovative 2-in-1 filter design that increases dirt-holding capacity by 91% compared to traditional filters. It has all the features of a coreless design –without the expense of housing modifications. These filters are environmentally friendly and fully disposable – reducing waste and disposal costs. Increased dirt holding capacity extends filter life and reduces maintenance costs.

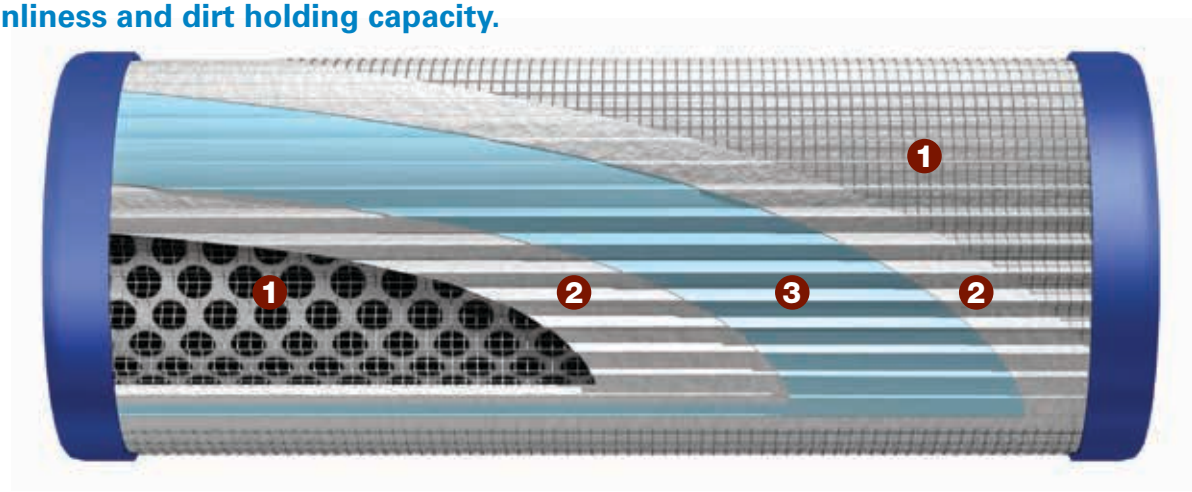
DX2 filters are available in HF3 (9600) style filters.



POWERTHERM

See How Donaldson DT Filters Work

DT cartridge filters feature an advanced pleat pack design that provides higher initial cleanliness and dirt holding capacity.



1 Epoxy-Coated Steel Support Mesh

(Upstream and Downstream Sides)

- Provides excellent pleat support and spacing, which allows for maximum effective media area
- Protects against media damage during handling and installation

2 Media Support Layers

(Upstream and Downstream Sides)

- Optimizes media support
- Protects media during pressure surges

3 Synteq™ Media Technology

Donaldson-developed Synteq synthetic filter media has smooth, rounded fibers for low resistance to fluid flow. Synteq media is ideal for filtering synthetic fluids, water glycols, water/oil emulsions, HWCF (high water content fluids) and petroleum-based fluids.

- High-efficiency media grades with performance to ß<4(c)=1000 (per ISO 16889)
- Exceptionally low flow resistance
- Consistent performance throughout filter life
- Excellent fluid compatibility

Donaldson DT replacement filters are engineered to fit many competitive applications, including:
